

Utilização da automação para criação dos usuários na AWS

Criação dos usuários na console da AWS

## Aplicação das Políticas nos grupos na AWS

The screenshot shows the AWS IAM console for the CloudAdmin user group. The left sidebar contains navigation links for Identity and Access Management (IAM), Access management, Access reports, and Credential report. The main content area displays the CloudAdmin user group details, including its name, creation time, and ARN. The Permissions tab is selected, showing a list of attached policies: EnforceMFAPolicy and AdministratorAccess. The EnforceMFAPolicy is a customer-managed policy that forces MFA for users and groups. The AdministratorAccess is an AWS-managed policy that provides full access to AWS services and resources.

CloudAdmin

Summary

User group name: CloudAdmin

Creation time: August 15, 2023, 20:24 (UTC-03:00)

ARN: arn:aws:iam::605092273258:group/CloudAdmin

Permissions policies (2)

Policy name	Type	Description
EnforceMFAPolicy	Customer managed	Force MFA for users and groups
AdministratorAccess	AWS managed - job function	Provides full access to AWS services and...

The screenshot shows the AWS IAM console for the DBA user group. The left sidebar contains navigation links for Identity and Access Management (IAM), Access management, Access reports, and Credential report. The main content area displays the DBA user group details, including its name, creation time, and ARN. The Permissions tab is selected, showing a list of attached policies: EnforceMFAPolicy and AmazonRDSFullAccess. The EnforceMFAPolicy is a customer-managed policy that forces MFA for users and groups. The AmazonRDSFullAccess is an AWS-managed policy that provides full access to Amazon RDS via the AWS Management Console.

DBA

Summary

User group name: DBA

Creation time: August 15, 2023, 20:24 (UTC-03:00)

ARN: arn:aws:iam::605092273258:group/DBA

Permissions policies (2)

Policy name	Type	Description
EnforceMFAPolicy	Customer managed	Force MFA for users and groups
AmazonRDSFullAccess	AWS managed	Provides full access to Amazon RDS via the AWS Management Console.

The screenshot shows the AWS IAM console for the LinuxAdmin user group. The left sidebar contains navigation links for Identity and Access Management (IAM), Access management, Access reports, and Credential report. The main content area displays the LinuxAdmin user group details, including its name, creation time, and ARN. The Permissions tab is selected, showing a list of attached policies: EnforceMFAPolicy and AmazonEC2FullAccess. The EnforceMFAPolicy is a customer-managed policy that forces MFA for users and groups. The AmazonEC2FullAccess is an AWS-managed policy that provides full access to Amazon EC2 via the AWS Management Console.

LinuxAdmin

Summary

User group name: LinuxAdmin

Creation time: August 15, 2023, 20:25 (UTC-03:00)

ARN: arn:aws:iam::605092273258:group/LinuxAdmin

Permissions policies (2)

Policy name	Type	Description
EnforceMFAPolicy	Customer managed	Force MFA for users and groups
AmazonEC2FullAccess	AWS managed	Provides full access to Amazon EC2 via the AWS Management Console.
